

Stabilization Facility for Libya, sample visualization

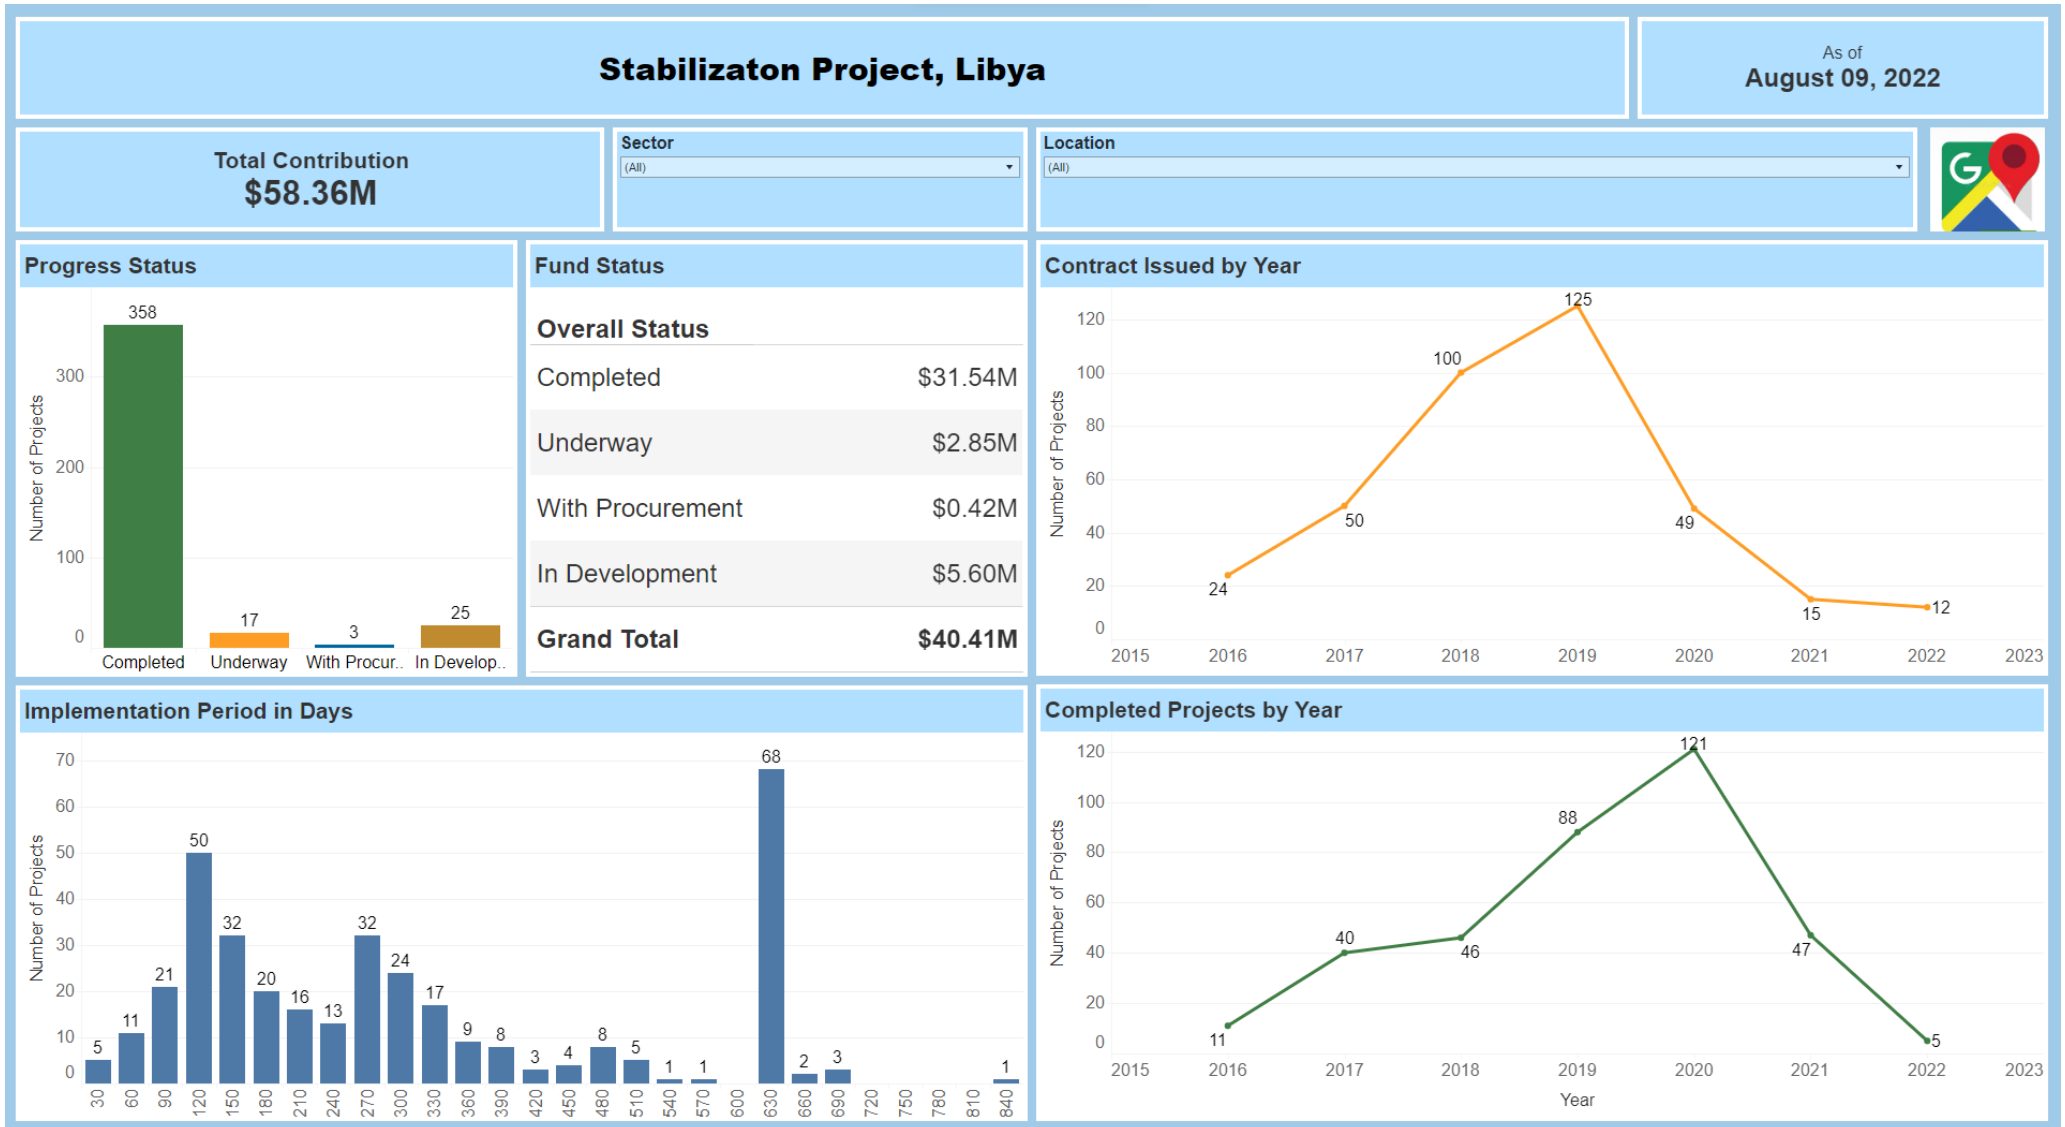

This Tableau visualization was prepared using Tableau Public, which is a free version of Tableau.

This is a visualization representing my engagement with UNDP Libya Stabilization Facility. For the purpose of this portfolio and general sharing, the visualization was recreated in Tableau, where the names of individual projects (activities) have been generalized and financial figures have been altered from the actual data. The snapshots of visualizations are provided below.

The link to the visualization is here.

https://public.tableau.com/views/Stabilization/Home?:language=en-US&:display_count=n&:origin=viz_share_link
